Geography Knowledge Map

Biomes

How do the plants, animals, and climate differ between the world's biomes?

The skills I need:

- Locating biomes and relating them to climate zones
- Describing and explaining physical and human characteristics
- Using maps and interpreting data

Adaption	The changes plants and animals make to survive in their environment.
Biodiversity	The variety of all living things on Earth.
Biome	Large area of land with a shared climate, plants and animals.
Climate	Weather conditions over a period of time.
Desert	A large, dry area of land with little rainfall.
Ecosystem	The animals, plants and microorganisms within a habitat.
Forest	A large area of land covered with trees.
Grassland	Large open areas of grass with a few scattered trees.
Marine	Anything related to the sea or the oceans.
Savannah	A combination of woodland and grassland.
Tundra	A large, cold, treeless biome.
