Geography Knowledge Map

Climate Change

How does climate change influence the frequency and severity of flooding and drought in our local area?

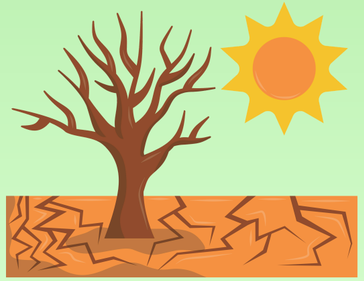

The skills I need:

- Observe physical and human features
- Analyse cause and effect
- Analyse data and apply knowledge
- Identify hazards

Climate	Weather conditions over a period of time.
Drought	A long period of dry weather leading to a water shortage.
Extreme	Unexpected weather which is not usual for the time of year.
Flood	A large, rising body of water beyond what is normal.
Hazard	A natural or human-made event that is a risk to people property and the environment.
Weather	What it is like at a specific time and place e.g. temperature, rain, sun, wind.
