Geography Knowledge Map

Industrialisation

How did Birmingham's location and natural resources help it become an important industrial city?

The skills I need:

- Understanding how an area has changed over time
- Understanding and describing how physical and human factors influence an area
- Connecting human settlement with the environment

City	A large human settlement.
Industrialisation	A process where countries start to use machines to do work that people once did.
Infrastructure	Important systems and structures that help a community to function.
Labour	Term used to describe physical work.
Natural Resources	Materials found in nature that can be used by people.
Trade	The buying and selling of goods and services.
