Design and Technology Knowledge Map

Navigating the World

How can digital technology help people navigate the world more effectively?

The skills I need:

- Generating and refining ideas
- Selecting and using tools accurately
- Solving problems
- Improving outcomes
- Evaluating products

Application (app)	A computer programme designed for a particular purpose.
CAD	Computer-aided design.
CGI	Computer-generated imagery.
Concept	A visual plan of an invention or idea to share with others.
Duplicate	To produce an identical copy of the original item.
Navigation	Finding a route from one place to another.
Pitch	A presentation to persuade someone to buy or invest in a product.
