Design and Technology Knowledge Map

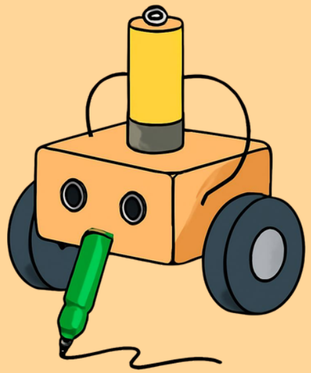

Wobble Bots

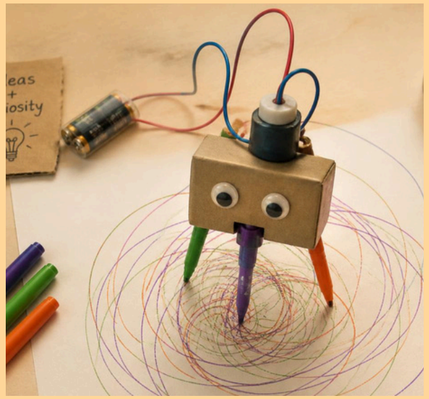

What makes a wobble bot wobble, and how can we improve its design?

The skills I need:

- Selecting and assembling products
- Testing ideas
- Problem-solving
- Working collaboratively
- Working safely

Assemble	To put parts together.
Circuit	The path that electricity flows through to power components.
Electrical components	The parts used to build an electrical circuit.
Evaluate	Assessing what is working well and what needs to improve.
Off-centre	Something that is positioned away from the middle.
Trial and error	Trying different ways to do something and learning from mistakes to find the best solution.
