Science Knowledge Map

Light

How does light help us to see and understand the world around us?

The skills I need:

- Using a data logger correctly
- Making careful systematic measurements
- Using evidence to answer questions in simple conclusions
- Suggesting improvements to my work

Absorb	To take in light rather than reflect it.
Darkness	The absence of light.
Light	A form of energy that helps us see the world around us.
Light Source	Something that produces its own light.
Opaque	Doesn't allow light to pass through, so you cannot see through it.
Reflection	When light bounces off a surface.
Shadow	A dark shape made when an object blocks light.
Translucent	Allows some light through, but you cannot see clearly through it.
Transparent	Allows light to pass through it, so you can see clearly through it.
