Year 6 - Cycle A
Autumn Term 2

English

We will start the term applying our historical knowledge to develop an Anglo-Saxon Battle Speech. We will then use 'A Christmas Carol' to explore playscripts. Children will continue to develop their inference and deduction skills within guided reading. We will focus on maintaining high quality handwriting across longer pieces of work.

Maths

Our focus for this half term is fractions. We will build on our prior knowledge of equivalent fractions to compare, order, add and subtract fractions to solve a range of problems. We will then learn how to multiply and divide fractions. We will also learn how to find fractions of amounts. At the end of the term we will revise converting units of measurement.

Design and Technology

Children will explore what makes a wobble bot wobble. They will select pieces and assemble products, test ideas, and work collaboratively to try and improve the design of a wobble bot.

PSHE

Children will revise key learning from last half term. They will then consider why media has age restirctions and how data is shared online.

Geography

We will be finding out how buying different products affects people in other countries. We will analyse patterns, interpret data and ask questions to evaluate persectives and ethical considerations.

PE

In tag rugby, children will work as a defending unit to prevent attackers from scoring and use a variety of attacking skills to beat a defender. WIthin fitness sessions, they will develop a greater awareness of what their body is able to do through collecting, recording and analysing performance.

Music

Children will listen to Gospel song and begin exploring the key elements that give it a unique sound. They will recognise individual instruments by ear and be able to use musical vocabulary to explain their ideas.

RE

Pupils will be able to suggest similarities and differences between how people practise their religion in the UK and India. They will explore what is meant by the term theist and recognise ways in which geography, history and culture can influence worship.

Spanish

Children will learn about the phonics and pronunciation of ga, ge, gi, go and gu. They will revise basic greetings and numbers to 20. Children will then learn about the nouns, articles/determiners for introducing family members.

Science

Children will explore how to design and make effective circuits whilst experimenting with varying voltages to affect the volumes of buzzers, the brightness of lights and the speeds of motors.

Computing

Children will learn how to create media. They will explore the capabilities of digital devices and experiment with different camera angles. They will plan work using a storyboard and be able to import their work into editing software.
