Computing Knowledge Map

Systems and Searching

How is information shared between systems and devices?

The skills I need:

- Knowing how to keep my personal information safe online
- Using and refining web searches
- Considering how reliable the information I have found is

Index	A list of data - it helps to speed up searching.
Rank	Search engines use rules to rank results, the one found first appears at the top.
Search Engine	A tool which searches a vast database of web pages to find information.
System	Inputs and outputs that work together to complete tasks.
Web crawler	Constantly visits web pages to keep search engines up-to-date as an index.
Website	A collection of information.
World Wide Web	A vast netwok of interconnected websites and web pages with global access.
